(dock rates) is a well established method of publishing rates." (Underscoring supplied.)

Indeed, dock rates have been in existence for many years. For example, dock rates were published in ABC Freight Forwarding Corporation Tariff ICC-FF 48 effective March 30, 1959. Dock rates were provided for on pages 46 and 104. It should be noted that these dock rates were brought forward from earlier publications which go back much farther in time. Dock rates were also brought forward in TNT Tariff ICC-FF 4 which became effective March 19, 1973. Similarly Republic Carloading and Distributing Company, Inc. also published dock rates in its tariff ICC-FF 199 effective September 2, 1959, brought forward in Supplement No. 262 to ICC-FF No. 199 effective May 14, 1973. Also Universal Carloading and Distributing Company published dock rates effective May 2, 1962 in its tariff ICC-FF No. 308 brought forward in Supplement 165 to ICC-FF 308 effective April 4, 1973.

The foregoing clearly demonstrates that dock rates have been a part of freight forwarder publications for many, many years and that they are a form of rate publication indigenous to the freight forwarder industry. To declare as

the Judge did that dock rates constitute a disruptive force to the rate structure of TNT implies that this form of publication is novel and without precedent. This is hardly the case as shown above; and the $1.00 dock rate will cause no more disruption than dock rates have in the past.

In view of the inapplicability of the protestant's cost exhibit, it is clear that protestant's allegations are without substance. The remaining exhibits of the protestant, which merely depicts the method of arriving at the dock rates or which compare dock rates with non-comparable pickup and delivery allowances, hardly form the basis of a prima facie case where, in fact, there is no showing of diversion of traffic.

Protestant's cost analysis is not representative of the freight forwarder costs involved in this proceeding. Therefore, the finding of the Commission in Lead and Zinc supra at page 104 is warranted here. Thus, the Commission held:

> "We are not satisfied that such costs are representative of the respondent's costs on the articles here considered. There is no indication that the considered rate constitutes a destructive competitive practice.
>
> We find that the rate under investigation is not shown to be unlawful. An order will be entered discontinuing the proceeding."

The conclusion set forth above is fully warranted here.

Additionally, protestant cannot seek any support from the Commission's order affecting Lifschultz Fast Freight for as the Commission held in Forwarder Class Rates, Official and W. T. L. Territory 310 ICC 785, 790:

> "The mere reference to the findings and orders in a prior proceeding without some showing of similarity of transportation conditions affecting the respective rate situations, is inadequate support for a finding of unlawfulness. The burden of proof as to American's rates is not on American, but on those who seek to have those rates found unlawful."

Likewise, here protestant refers to numerous cases but that is not enough to establish a prima facie case.

IV.

THE PROCEEDING SHOULD BE REOPENED FOR FURTHER HEARING FOR THE RECEPTION OF EVIDENCE.

While respondent believes that no prima facie case has been established, nevertheless, out of an abundance of caution, respondent herewith submits for consideration the verified statement of Mr. Craig Rockey, a senior cost analyst with the economic consulting firm of Snavely, King and Tucker.

In the limited time available to research and prepare his study, Mr. Rockey arrives at conclusions which clearly demonstrate that the assailed dock rates are just and reasonable. Thus, Mr. Rockey's statement demonstrates that for the bulk of the TNT shipments handled, the $1.00 dock rate is compensatory, and therefore it is just and reasonable.

Mr. Rockey's statement not only is more representative than that of protestant, but it also takes into consideration 1974 costs. Consideration must be given to Mr. Rockey's statement by the Commission for a proper and lawful disposition of this proceeding.

V.

CONCLUSION

As indicated above, the publication of dock rates by forwarders is not novel. The present dock rates of TNT merely reflect current economic conditions. As the Commission held in Class Rates From Chicago, Illinois To Texas 308 ICC 467 at pp. 472-473:

"The rates under investigation have

> been in effect as either class or commodity rates for 7 years without any indication that they have caused a downward revision of rates to other points. They do not appear to be competitively destructive. In addition, they are generally compensatory for the freight forwarders as well as for the motor carriers. Recently amended section 15a (3) of the act provides that the rates of a carrier shall not be held up to a particular level to protect the traffic of another mode of transportation. By analogy, therefore, the reduced rates of Texas Shippers, a freight forwarder, should not be forced to an artificially high level merely to protect the traffic of motor-carrier competitors."

The most that can be said for the protestant's position is that the TNT schedules must be artificially held to a higher level merely to protect the traffic of its member carriers. However, despite the fact that these dock rates have been in effect since July 31, 1972, protestant has not been able to show that it has had to make a downward revision of its rates, nor has it shown any diversion of traffic. There has been no showing of harm to protestant or its member carriers.

In view of the foregoing, it is submitted that upon reconsideration that the Commission should find that protestant has not borne the burden of establishing a prima facie case and that the investigation be discontinued.

It is also requested that the proceeding be reopened to receive the attached statement of Mr. Craig Rockey.

Respectfully submitted,

SNAVELY, KING & TUCKER, Inc.
ECONOMIC CONSULTANTS

VERIFIED STATEMENT OF CRAIG F. ROCKEY

My name is Craig F. Rockey. I am a transportation cost analyst for the economic consulting firm of Snavely, King & Tucker, Inc. with offices located at 1747 Pennsylvania Avenue, Washington, D.C.

Snavely, King & Tucker was formed in 1970 to provide consulting services in the fields of transportation and communications cost finding and economics. I have held the position of senior cost analyst with the firm since its formation. I have specialized in cost studies for motor carriers, railroad, water carriers, freight forwarders, pipe lines, and intermodal operations. I have previously submitted statements before the Interstate Commerce Commission (ICC) in connection with motor carrier operations. I hold a Bachelor of Science degree in transportation/economics from the University of Maryland.

I have been asked by ABC Freight Forwarding Corporation to identify, insofar as data are available, the motor carrier cost of picking up freight forwarder shipments and delivering them to freight forwarder docks. Specifically, I have been requested to determine whether, under what circumstances and for what sizes of shipments, the function could be performed for less than $1.00 per shipment.

This pickup service could be performed by any one of these operations: (1) a freight forwarder using his own truck, (2) a local cartage company hired by either the freight forwarder or the shipper, or (3) the shipper himself using his own truck. In any case, there is no reason to assume that the physical operations, the equipment, or the man-hours required differ significantly as between these three types of operators. As I will discuss subsequently, there would likely be some difference in the capital costs, overheads, and billing and collecting costs as between a cartage operator on the one hand and a freight forwarder of shipper on the other.

The Interstate Commerce Commission's Section of Cost and Valuation annually publishes a statement which shows variable service unit costs and performance factors for motor carrier operation. These data are shown separately for each motor carrier region in the United States. The latest of these publications is Statement Number 2C1-71, "Cost of Transporting Freight by Class I and Class II Motor Common Carriers of General Commodities," July 1973. This publication provides cost factors for all regions and territories for the year 1971.

I have selected for my study the Eastern-Central region. This region corresponds roughly with the Northeast quadrant of the country east of the Mississippi River and north of the Ohio and Potomac Rivers. I have selected this region, first, because it contains the majority of the industrial activity of the United States and, second,

because the protestant in this proceeding is the Eastern Central Motor Carrier Association, Inc. (ECMCA) which covers this same general area. The cost data presented in this statement were derived from a sample of 20 Class I common carriers of general freight, principally operating in the Eastern-Central territory and having gross revenues over $500,000 with 75 percent or more such revenues being derived from general commodities. Eighteen of the 20 carriers used in this sample are members of the ECMCA.

The specific costs to which I shall refer, relate only to the functions involved in pickup and delivery operations at origin and destination terminals. The costs presented herein apply to small shipments under 5,000 pounds such as would most likely be handled by freight forwarding companies. For shipments of this size there is no reason to suppose that the equipment, facilities, labor, and other operational characteristics of the pickup service of Class I common carriers would differ materially from those involved in the pickup operations of freight forwarding companies, cartage operators, or shipper-owned truck fleets.

Attachment A is a true copy of page 40 of ICC Statement Number 2C1-71. This page contains a table which presents variable terminal costs at origin, destination, and interchange points for shipments weighing up to 9,999 pounds. Costs are presented for four separate functions, three of which would be required for pickup service by a cartage operator and two by a private shipper or a freight forwarder.

The stop costs on Attachment A relate to the loading of the pickup vehicle at the shipper's dock. They do not cover the unloading at the forwarder's dock. However, they relate to both pickup and delivery at both ends of an inter-city line-haul movement. In effect, they cover two stops. The pickup of a freight forwarder shipment can be equated with one stop. Since the functions performed at the other end, namely delivery at the freight forwarder's dock, are largely the same, it too can be equated with one stop. The complete pickup will thus equate with two stops, which as pointed out are what is reflected in column (4) of Attachment A.

Running costs cover the cost of vehicle operation and driver wages while moving between shipper's facility and carrier's terminal. These costs also cover both origin and destination. They would, therefore, have to be halved to apply to a single pickup.

Platform handling costs involve both the off-loading from the pickup vehicle and the loading of the line-haul vehicle. I have used a second stop cost as a more appropriate measure of the off-loading cost because of the impossibility of dividing the platform cost between the pickup and line-haul function.

Billing and collecting costs would not be incurred for a freight forwarder himself or by the shipper. However, a cartage operator

would have to prepare a bill for submission to his customer, be he a freight forwarder of a shipper. Therefore, billing and collecting costs would be incurred for pickup by a cartage carrier.

The lower portion of Attachment A displays a number of density adjustments which are used to inflate or deflate the costs presented on the upper portion depending upon density, that is, pounds per cubic foot of freight typically handled. I have been informed by ABC freight Forwarding that the average density for the traffic handled by that company is approximately ten pounds per cubic foot. I have, therefore, adjusted the respective stop and running costs by a factor corresponding to the simple average of the two categories, 5 to 9.9 pounds per cubic foot and 10 to 14.9 pounds per cubic foot. This resulted in an inflator of 1.06 for stop costs and 1.12 for running costs. In Attachment B, I have applied adjustments to the raw costs derived from Attachment A. The adjusted costs are shown in columns (3) and (5) of Attachment B.

The costs presented in Attachment A relate to year 1971. The inflation in the three years since 1971 requires a restatement of those costs to current levels. For this restatement, I have employed the gross national product implicit price deflator for the third quarter of 1974 as a ratio to that in 1971 to yield 1974 costs in column (7). This factor no doubt understates the impact of inflation on motor

common carrier operations. It suggests a 21.6 percent average increase in prices. Yet the inflation in fuel costs for motor carriers has exceeded 130 percent since 1972.[1/]

Thus, column (7) of Attachment B displays a conservative estimate of the current variable pickup costs at each of 15 different unit shipment weights. It shows a breakpoint at about 1,000 pounds. Any shipment less than 1,000 pounds incurs a cost greater than $1.00. Shipments over that weight involve a lesser cost. As discussed above, a cartage operator providing the same pickup service would incur a billing and collecting cost for each shipment. Adding the costs in column (7) in Attachment A to those in column (6) in Attachment B would increase the breakpoint, but not above the level of one ton (2,000 pounds).

These costs, however, are variable costs and do not include the fixed costs involved in owning and maintaining a truck fleet. These costs would have to be incurred to some degree by any fleet operator, be he a shipper, freight forwarder, or cartage company. The variable expenses presented in Attachments A and B are based on 90 percent of total operating expenses, rent, and taxes. Therefore, full costs would be on the order of 10 percent greater. Even then, they would

---

[1/] American Trucking Association's estimate.

still exclude any allowance for normal profit and the accompanying income tax. They, therefore, represent only the "bare bones" cost of pickup service.

These considerations suggest that a compensatory pickup service in the Eastern-Central territory can be performed for less than $1.00 only for shipments weighing about one ton or more. Shipments weighing less than that amount will incur a cost greater than $1.00, particularly if performed by an independent cartage operator who is obliged to cover full fixed costs, corporate overheads, and earn a reasonable profit. The 1972 Transport Statistics, Part 8[1/] reveals that the average shipment weight for Class I freight forwarders was 602 pounds. The specific average weight per shipment for ABC Freight Forwarding Corporation was 605 pounds. However, a sample study of ABC's shipments during the 35 weeks of operations ending August 31, 1974 revealed an average weight per shipment of 480 pounds.

1. See item 8 of explanatory data for examples of the application of the data in this table to specific movements of traffic.
2. No adjustment is provided for density because the total running cost on single-stop trips is charged to whatever weight is handled on such trip thus automatically adjusting for the effect of density on the running cost. The stop costs represents the actual interchanging of the vehicles which would not be affected by the density of the traffic interchanged.
3. Total expense for a trailer drop and pickup at origin or destination, not both, is 240.60¢.
4. The adjustment ratio for a density group (pounds per cubic foot) more nearly represents a density for the midpoint of the group. Therefore, such ratios should be trended to obtain proper density ratios for traffic whose density may fit within the density group but does not approximate the midpoint of the group.

FURTHER HEARING

Comes now the Rocky Mountain Motor Tariff Bureau, Inc. (RMB), protestant in the above proceeding, and submits its Reply to the Respondent's Petition for Reconsideration and Further Hearing, served January 2, 1975, and respectfully says:

STATEMENT OF THE CASE

Under the date of November 27, 1973, RMB protested and requested suspension of Item 520-C in Supplement 41 to Freight Forwarders Tariff Bureau, Inc., Agent, Tariff 16-K, I.C.C.-F.F. 206. The assailed matter involved an allowance of one dollar ($1.00) per hundred pounds on LTL shipments that were transported to the forwarder at its facility without expense to the forwarder.

After due consideration of protestant's Petition for Suspension and the reply for and on behalf of the involved forwarders, the Suspension

and Fourth Section Board, by its Order dated December 14, 1973, concluded to place the proposal under suspension to and including July 14, 1974, in I. & S. Docket No. 8894 (Sub No. 1), *Allowance for Delivery of Shipments to Forwarder Facilities*, and the Commission, on its own motion, by Order dated December 12, 1973, instituted an investigation into the existing provisions in paragraph (f), Item 52000, TNT Tariff Agents, Inc., Agent, Tariff No. 14, I.C.C.-F.F. No. 15, under Docket No. 35921 (Sub No. 1), *Allowance for Delivery of Shipments to Forwarder Facilities*.

By Order served December 17, 1973, the matter, Docket No. 35921 (Sub No. 1), *supra*, was assigned for handling under modified procedure with respondent's Opening Statement due January 7, 1974, and protestant's statement due thirty days thereafter. After timely filing of this protestant's statement, and respondent's reply thereto, the Commission, by Administrative Law Judge Albert E. Luttrell, issued its Initial Decision under service date of June 20, 1974, finding the assailed allowance resulting in rate reduction, for delivery of shipments to freight forwarders facilities, in lieu of forwarder provided pickup, not shown to be just and reasonable.

Respondent, on July 17, 1974, filed exceptions to the decision of the Administrative Law Judge. Said exceptions were denied by Review Board No. 4 by Order served December 5, 1974. Now, respondent has filed a Petition for Reconsideration and Further Hearing. It is to this petition that we direct our reply.

MOTION TO STRIKE

Protestant initially moves to strike the Verified Statement of Craig F. Rockey contained on pages 16 through 25 of respondent's Exhibit No. 1 and the references made thereto in the first paragraph, Part III, page 9 and in Part IV, pages 12 and 13 of Exhibit No. 1. Said statement is an attempt by the respondent to introduce new evidence in contravention of the Commission's General Rules of Practice. Rule 101(b) requires that when opportunity is sought to introduce evidence in a petition for rehearing or further hearing, an explanation must be given as to why such evidence was not previously adduced. Respondent has not offered such explanation.

Clearly, had the assailed matter been introduced by respondent in its exceptions to the decision of the Administrative Law Judge, it would have been inadmissable. The Commission has consistently held that, under its General Rules of Practice, new matter may not be properly embodied in exceptions. See *Stopping in Transit - Agricultural Implements*, 303 I.C.C. 617. Therefore, it is protestant's motion that the identified matter be stricken from the record for the reason that it represents an attempt to introduce new evidence in contravention of the Commission's General Rules of Practice.

REPLY TO RESPONDENT'S PETITION FOR RECONSIDERATION

Respondent seeks reconsideration of the decision of Review Board No. 4 in upholding the decision of the Administrative Law Judge, on the sole ground that this protestant failed to establish a *prima facie* case. To the contrary, protestant respectfully submits for the reasons

hereinafter stated, that Review Board No. 4 did not err; that the protestant did, in fact, establish a *prima facie* case, and that the matter should be cancelled as ordered.

Initially, this protestant would like to put the nature of the present controversy in the proper context. At page 1 of its petition, and page 3 of Exhibit No. 1, respondent indicates that the assailed schedules were "legally published". It would be more accurate to describe the involved schedules as "legally effective but published in violation of the Commission's tariff circular rules." As this protestant has previously noted, respondent characterized this failure to properly symbolize the assailed matter as "merely an oversight" (page 2 of respondent's Opening Statement of Facts and Argument). Nevertheless, we once again note that the Commission has authority to strike from its files any tariff matter which is not filed in conformity with the Interstate Commerce Act and the applicable regulations thereunder. See *Acme Fast Freight v. United States*, 30 F. Supp. 968 (S.D.N.Y., 1940), aff'd *per curiam*, *Acme Fast Freight v. United States*, 309 U.S. 638, and *Heavy and Specialized Carriers' Tariff Bureau v. U.S.A.C. Transport, Inc.*, 302 I.C.C. 487 (1957).

Respondent's sole contention in seeking reconsideration of Review Board No. 4's decision finding the assailed schedules to be unlawful, is that protestant failed to present a *prima facie* case. In this protestant's Opening Statement of Facts and Argument, Witness Anderson directed the Commission's attention to motor carrier pickup costs, as shown in the Commission's Cost Statement 2C1-71, Transcontinental Region,

avering that pickup and delivery service is essentially similar whether performed by motor carriers or freight forwarders. Then, setting forth a specific example on a Transcontinental movement, this protestant showed that the existing schedules would have, in fact, provided a rebate for a shipper performing the involved pickup service, in violation of Section 405(c) of the Interstate Commerce Act. This showing also verified that the allowances, or dock rates, as respondent would call them, were in violation of Section 415 of the Act. Thus, from the Commission's own Cost Statement, it was shown that the allowances violate Section 415 of the Act in that any shipment weighing more than 400 pounds would produce an unlawful rebate for the shipper providing the involved service.

Respondent, in its reply statement dated February 22, 1974, provided no information whatsoever to rebut this protestant's *prima facie* showing that the cost to shippers would be less than the allowances for shipments handled under the existing schedules. Respondent's general contention was that it would cost shippers more than freight forwarders to perform such a service. If this were in fact the case, then there would be no reason why the shipper would take advantage of the allowances unless they provided a rebate, because the shipper could have the forwarder provide the service at a lower cost. At any rate, this protestant's evidence established *prima facie* that the allowances were unjust and unreasonable, in violation of Section 415 of the Interstate Commerce Act.

This protestant also noted that one of respondent's own shipper witnesses had diverted substantial tonnage from the motor carriers to the freight forwarders as a result of the published "dock rates". (See page 2 of 30, Exhibit No. 3, Docket No. 35921.) Respondent's tenuous reply was that the published rates were "not designed to divert traffic" (page 4 of Respondent's Reply Statement). The fact remains, however, that diversion from the motor carriers was established.

At page 5 of the Initial Decision of the Administrative Law Judge, served June 20, 1974, the Administrative Law Judge noted the following:

> In this judge's opinion protestant made out a *prima facie* case that granting one dollar per one hundred pounds for delivery of shipments to a forwarder's facilities in lieu of a forwarder's provided service, pursuant to Item 52000 of the T.N.T. tariff is unjust and unreasonable. (Emphasis supplied.)

On the same page, the Judge also noted that:

> ...Respondent did not attempt to show the pick-up costs when the shippers provide such services themselves.

Thus, the record is clear that respondent totally failed to rebut this protestant's *prima facie* case, and that the Administrative Law Judge and Review Board No. 4 properly found the provisions to be unjust and unreasonable.

REPLY TO RESPONDENT'S PETITION FOR FURTHER HEARING

Respondent's request for further hearing involves basically an attempt to submit new evidence which respondent hopes will rebut the *prima facie* case established by the protestant. Respondent's Exhibit No. 1 states in effect "protestant's have failed to make a *prima facie*

case, however, in the event they have, here is the new evidence by which we will rebut their *prima facie* showing."

Respondent's Exhibit No. 1 is replete with references to "due process" and its application in the involved proceeding. On the assumption that due process applies equally for both parties, this protestant submits the following language of the Commission in No. MC-F-10767, *Donald L. Washum - Control - Haywood Washum*, served January 3, 1975 (not printed), at page 2:

> It further appearing, That if this Commission were to exercise its discretionary powers in the manner sought by applicants in their present petition, the relevant case law makes it clear (See, for example, *Yourga v. U.S.* 191 F. Supp. 373) that the proponent of such action has the burden of showing the following: (1) why such evidence would not be cumulative; and (2) why such evidence was not previously adduced at the appropriate stage of the administrative proceedings, which in this instance was the oral hearings conducted in May of 1970; that, focusing on the situation now under consideration, applicants have failed to show that the shipper statements sought to be introduced at this time are not cumulative in nature, nor why they were not introduced at the oral hearings in these proceedings; and that, in particular, we are unpersuaded by the contention of applicants that 'changing times' compel or require as a sole ground the reopening of these proceedings at this stage for further hearing; and that, as many courts have ruled in similar circumstances, all administrative proceedings must end at some point (*U.S. v. Pierce Auto Freight Lines*, 327 U.S. 515, 534-35), parties should not be permitted to reopen a proceeding for the introduction of a type of evidence, such as the shipper witnesses involved herein, clearly susceptible to prior production, and a party to a proceeding cannot continually seek to 'plug the gaps' in his case as that case evolves both on a factual and a legal basis (cf., *United States v. Northern Pacific Ry.*, 288 U.S. 490, 494);....

There has been absolutely no showing whatsoever as to why the new evidence was not previously adduced at the appropriate stage of the

administrative proceeding, although clearly susceptible to prior production. We hope, therefore, that the Commission will act favorably on this protestant's motion to strike.

Turning to the Verified Statement of Craig F. Rockey, this protestant is somewhat baffled by the manner in which the respondent is now proceeding. Witness Zentner, in the Opening Statement of Facts and Argument, stated at page 2:

> Protestant, in its petition for suspension, attempts to improperly apply motor carrier costing techniques to freight forwarder operations... In my opinion the Commission's Statement 2C1-70 has no relevancy in this proceeding.

And, in respondent's reply statement, Witness Zentner stated at page 1:

> ...Mr. Anderson seeks to justify his use of motor carrier costs by stating at page 5 that pickup and delivery service is essentially similar whether performed by motor carriers or freight forwarders. This may be true as far as the bare essentials are concerned, but, the cost picture is quite different.

Finally, in its exceptions to the Decision of the Administrative Law Judge, respondent, at page 4, stated:

> In arriving at his conclusion the Judge apparently relied heavily upon protestant's use of motor carrier cost figures. This is like comparing apples with oranges. There is no similarity between motor carrier costs and freight forwarder costs.

Now, however, Witness Rockey, in an attempt to rebut protestant's *prima facie* showing as to the costs of providing pickup service, states at page 3 of his statement:

> ...The costs presented herein apply to small shipments under 5,000 pounds such as would most likely be handled by freight forwarding companies. For shipments of this size, <u>there is no reason to suppose that</u> the equipment, facilities, labor and other operational characteristics

> of the pickup service of Class I motor common carriers would differ materially from those involved in the pickup operation of freight forwarding companies, cartage operators, or shipper owned truck fleets. (Emphasis supplied.)

Witness Rockey then proceeds to manipulate pickup and delivery costs shown in the Commission's Cost Statement 2C1-71 for the Eastern-Central Territory, to allegedly arrive at cost figures which a freight forwarder, motor carrier, or shipper owned fleet would incur in providing a pickup service. Thus, the cost methodology previously rejected by the respondent has now become the cornerstone of its petition for rehearing.

Even assuming, *arguendo*, that the cost data submitted by Witness Rockey has probative value, the data substantiates the very contention of this protestant that the subject allowances are unjust and unreasonable. Thus, Attachment B (Exhibit No. 1, page 24) shows that for shipments weighing 2,000 pounds or more, a rebate would be given to a shipper who performed the pickup service. We respectfully submit that only one-half of the stop costs from the Commission's Cost Statement should have been applied, as such stop costs represent costs for both pickup and delivery and we are only concerned with a pickup service in this proceeding. Proper application of such stop costs would result in the $1.00 allowance providing an unlawful rebate for shipments in excess of about 700 pounds. At any rate, attempts by Witness Rockey to show that the average shipment weight for Class I freight forwarders is below 2,000 pounds is irrelevant, because respondent fails to reveal any information whatsoever as to the average weight of shipments delivered to forwarders by shippers. Thus, the statement of Mr. Rockey, while an

improper attempt to introduce new evidence to rebut this protestant's showing, would fail to save respondent's case even on rehearing.

CONCLUSION

It is this protestant's firm belief that due process in this proceeding would have been best achieved by the Commission's rejection of the assailed tariff provisions which became effective by publication in violation of the Commission's tariff circular rules. Such action would have required the respondent to republish such provisions and placed the burden of proof of showing the justness and reasonableness of such provisions on the respondent. In our opinion, allowing such provisions to remain effective is to sanction ratemaking by "oversight", and unfairly shifts the burden of proof to protestant.

Fortunately, to this point, the Commission agrees that this protestant presented a *prima facie* case showing that the assailed matter is unjust and unreasonable, and that respondent failed to rebut this showing. Protestant has, therefore, met its burden of proof and cancellation of the subject provisions is fully warranted.

Wherefore, in view of all the foregoing, protestant respectfully requests that the Commission grant protestant's Motion to Strike; that respondent's Petition for Reconsideration and Further Hearing be denied; and that the Commission affirm the findings of the Administrative Law Judge and Review Board No. 4 and adopt them as its own.

Respectfully submitted,

The matter contained herein does not affect the quality of the human environment.

Comes now TNT Tariff Agents, Inc. (TNT), respondent herein, by F. H. Zentner, its Vice President, and submits this reply to protestant Rocky Mountain Motor Tariff Bureau, Inc., motion to strike.

I

Rocky Mountain Motor Tariff Bureau, Inc., the protestant in this case has filed a motion to strike in its reply to respondent's petition for reconsideration and further hearing. Protestant relies upon Stopping in Transit - Agricultural Implements, 303 ICC 617, to support its motion. That particular case has no application here since it concerns only exceptions to report and order recommended by an examiner. It is respondent's opinion, respectfully submitted, that the above case cited by the protestant has no bearing in the instant proceeding.

Also, the Commission's General Rules of Practice provide for a more liberal construction of the rules to provide at a just determination of the issues presented. (See Rule 2, 49CFR, Section 1102.2.)

In the current proceeding where challenged rate matter has been in effect for a considerable period of time, the respondent must be given full opportunity to defend the assailed matter to secure a just decision.

II

CONCLUSION

It is submitted that the protestant's motion to strike should be denied; that the protestant has not established a prima facie case of the unlawfullness of the rate matter under investigation; and that the investigation be discontinued.

INTERSTATE COMMERCE COMMISSION ORDER DATED MARCH 6, 1975

ORDER

At a Session of the INTERSTATE COMMERCE COMMISSION, Division 2, acting as an Appellate Division, held at its office in Washington, D. C., on the 6th day of March, 1975.

No. 35921 (Sub-No. 1)

ALLOWANCE FOR DELIVERY OF SHIPMENTS TO FORWARDER FACILITIES

Upon consideration of the record in the above-entitled proceeding, including the petition of respondent, TNT Tariff Agents, Inc., filed January 6, 1975, for reconsideration of the decision and order of Review Board Number 4, entered December 3, 1974, and for further hearing; of protestant's reply thereto containing a motion to strike, filed January 20, 1975, and of respondent's reply to the motion to strike, filed February 10, 1975;

It is ordered, That the petition for reconsideration and for further hearing be, and it is hereby, denied for the reason that sufficient grounds have not been presented to warrant granting the action sought.

And it is further ordered, That the order entered in this proceeding on December 3, 1974, which order, pursuant to section 17(8) of the Interstate Commerce Act, was stayed pending disposition of the petition be, and it is hereby, reinstated and modified so as to become effective 30 days from date of service hereof, with no other change in the requirements of said order.

Subject: Docket #35921
(Sub. No. 1)

Honorable Sir:

This is to advise you that on April 11th, 1975 I shall be filing a Petition for Review and a Motion for Stay pendente lite in the United States Court of Appeals for the Second Circuit pertaining to the above Order of the Interstate Commerce Commission.

I respectfully request at this time, that you stay the Order of the Commission in the above Docket until final judicial determination is had. You had consented to a Stay by Order dated the 21st day of March, 1975 under Docket #35921.

The instant Case (Sub. No. 1) is identical to Docket #35921 and the same identical errors were committed by the Administrator Law Judge in Sub. No. 1 as in Docket #35921.

The issuance of a Stay by you will obviate the filing of a Motion with the Court and I will then move to amend my Petition for Review and incorporate the Sub. No. 1 proceedings with the initial proceedings.

Thank you for your courtesies and consideration in this matter.

Very truly yours,

(b) The terms "delivery" or "store door delivery" as used in this tariff, means the service performed by the forwarder or its agent in transporting freight to a receiving room or doorway located on a platform or at street level directly accessible to highway vehicle of the forwarder or its agent, at a warehouse, factory, store, place of business or private residence. (See Paragraph (c) and EXCEPTIONS 1 through 7 in Item 621). (c) Pick-up and delivery as defined in paragraphs (a) and (b) does not include the performance of removal from or delivery to basements or floors not directly accessible to highway vehicle, nor does it include packing, unpacking, erecting, dismantling, inspection of property and other similar service. #§‡(d) Upon request of consignor, forwarder will perform inside collection from locations not covered by paragraph (a), only at points listed in Items 1100 to 1160 inclusive and only when freight can be picked up by one man, at a charge of 58 cents per 100 pounds, subject to a minimum charge of $8.68 per shipment. #§‡(e) Upon request of consignee or owner, forwarder will perform inside delivery to locations not covered by paragraph (b) (See Note A), only at points listed in Items 1100 to 1160 inclusive and only when freight can be delivered by one man, at a charge of: 58 cents per 100 pounds, subject to a minimum charge of $8.68 per shipment. (f) The forwarder may substitute railroad trap or ferry car service for service by highway vehicle to effect pick-up or delivery. (g) Shipments which may require additional labor can only be accorded pick-up or delivery service when the consignor or consignee furnishes such assistance as may be necessary in the loading or unloading of such articles at their place of business. Shippers or receivers whose employees assist in the loading or unloading of shipments under this rule, shall assume responsibility for accidents or injuries to their employees while so engaged. NOTE A - Inside delivery service to more than one (1) floor above or below the main floor of any building will be performed only when consignee provides elevator service. ‡ - NOT applicable on shipments provided for in EXCEPTION 5 of Item No. 621. § - NOT applicable on shipments to or from the Merchandise Mart Building in Chicago, Illinois. # - Inside delivery or pick-up service will be performed only on less than truckload shipments.

SECTION 3

ITEM NO.	RULES AND REGULATIONS
15	GENERAL APPLICATION Rates and charges in this tariff are stated in lawful money of the United States. The minimum weight provided in connection with a rate in this tariff is the lowest weight on which such rate will apply. Except as otherwise provided, the rates and charges in this tariff apply only on less than truckload shipments of articles and commodities described in the governing classification (see Item No. 5).
20	ALTERNATIVE APPLICATION OF CHARGES When the charges accruing on a shipment based upon the actual weight exceed the charges computed at a rate based upon a greater unit of weight, the latter shall apply. For the purpose of applying this item to shipments consisting of two or more commodities, subject to different rates, the difficiency between the actual weight of the shipment and the next greater unit of weight will be computed at the rate applicable to the lowest rated commodity in the shipment.
30	PICK-UP AND DELIVERY SERVICE Except as otherwise provided in this tariff or in tariffs referred to in Item No.10, the rates in this tariff will include pick-up and delivery service.
40	FREIGHT REQUIRING HEAT The rates and charges in this tariff do not include heater service for shipments requiring protection against cold unless the provisions of TNT Tariff Agents, Inc. Tariff No. 1, ICC-FF No. 1, TNT Tariff Agents, Inc., Agent, are fully complied with.
50	REFERENCES EMBRACE CHANGES BY SUPPLEMENT Reference to items, notes, pages, rules and sections, in this tariff, embraces any revision or successive issue of items, notes, pages, rules and sections. Reference to other publications includes reference to supplements,thereto and successive issues thereof.
60	DEFINITION OF TERM "TO" Where consecutive numbers are represented in this tariff by the first and last numbers connected by the word "to", they will be understood to include both of the numbers shown.
70	CLASSES NOT PROVIDED FOR On articles subject to classes for which no rates are provided in this tariff, apply the rate for the next higher class for which a rate is provided.
80	DEFINITION OF "EASTBOUND" AND "WESTBOUND" When "Eastbound" is used in this tariff, it means a shipment from a point of origin provided for in List of Western Points in Section 2 of tariff to a point of destination provided for in List of Eastern Points in Section 1 of Tariff. When "Westbound" is used in this tariff, it means a shipment from a point of origin provided for in List of Eastern Points in Section 1 of tariff to a point of destination provided for in List of Western Points in Section 2 of Tariff.
90	OTHER RULES, REGULATIONS, TERMINAL PRIVILEGES AND CHARGES In the absence of specific provisions in this tariff to the contrary, shipments transported under this tariff will be subject to the provisions of the tariffs of the individual forwarders participating herein or of their tariff publishing agents, which are referred to in Item No.10 herein.
200	ARBITRARY FROM OR TO HIGHLAND, INDIANA When reference is made to this item apply rates from or to Chicago, Ill. plus an additional $1.00 per 100 pounds, minimum charge $1.00 per shipment.
250	APPLICATION OF RATES TO BENTON HARBOR, MICH. Class Rates to Benton Harbor, Mich. will be determined by adding the following arbitraries to the rates or charges applicable to Detroit, Mich. When the shipment weighs: — Add to charges: 150 pounds or less — $8.00 Over — Not over 150 pounds....200 pounds..... 8.50 200 pounds....250 pounds..... 9.50 250 pounds....300 pounds..... 10.50 On shipments weighing over 300 pounds add $4.25 per 100 pounds.

SECTION 5.1

TABLE OF CLASS RATES

ITEM NO. 10500 (See Note)

1. Rates named in this section apply on all traffic, except:

   a) On traffic where rates are provided for in Section 6 (shipments delivered to forwarders' terminals) and

   b) When charges accruing under the application of Section 7 (Export Class Rates) result in lower charges than those accruing under this section.

2. Rate basis numbers in this section apply between rate groups listed in Section 4.

3. Classes in this table are determined by the governing classification and exceptions thereto as provided in Items 5 and 10.

4. WEIGHT GROUPS

   L 5C - Applies on shipments weighing each less than 500 lbs.
   M 5C - Applies on shipments weighing each 500 lbs. or more but less than 1000 lbs.
   M 1M - Applies on shipments weighing each 1000 lbs. or more but less than 2000 lbs.
   M 2M - Applies on shipments weighing each 2000 lbs. or more but less than 5000 lbs.
   M 5M - Applies on shipments weighing each 5000 lbs. or more.

NOTE - RATES IN THIS SECTION ARE SUBJECT TO APPLICATION OF MINIMUM CLASS RATES PROVIDED IN SECTION 5.

SUBJECT TO MINIMUM CLASS RATE APPLICATION IN SECTION 5

SECTION 7
EXPORT CLASS RATES

ITEM 10700

1. Rates and charges in this section apply only from points in ILLINOIS, INDIANA and WISCONSIN listed in this section to points in NEW JERSEY and NEW YORK listed in this section.

2. Classes in this section are determined by the governing classification and exceptions thereto as provided in Items 5 and 10.

3. Rates in this section apply on shipments of any quantity.

4. The minimum charges for shipments moving under the provisions of this section shall be as provided in Item 750, Part 3.

5. If the charges accruing under the application of domestic class rates are lower than the charges accruing under this section, such lower charges shall apply.

6. This section applies only on shipments destined to foreign countries, except Canada and Newfoundland, and including Cuba and insular possessions of the United States (Puerto Rico and Virgin Islands) and Panama Canal Zone. Movement must be directly from forwarder to shipside, pier or dock of vessel, except that shipments may be delivered to warehouse or other destination pending export, provided bill of lading is endorsed by periodic inspection by representative of the forwarder to show such export. If such shipments have not been exported within six months, the rate will be adjusted to the domestic rate applicable and the difference will be collected by the forwarder.

7. The provisions of this section will not apply on export movements via air carriers.

SECTION 7

EXPORT CLASS RATES

(For application, see title page of this section)

(Except as otherwise provided, delivery at the Port of New York not included in these rates)

See Item 10 for tariffs containing rules, rates and charges for delivery of export shipments at the Port of New York.
